Comments: We all say it's worth it until it happens to us and then suddenly reality hits us

It was an avoidable tragedy we could've prevented if we just could've seen what could've happened and known that it was going to happen to us we would've made different choices.

Speaking from experience unfortunately for me and my family.

We lost our daughter because of an accident and the time it took to get to her she was swimming with friends.

NOT WORTH IT

When it happens to YOU AND YOURS!

Save the Lives it WILL TAKE & close it off PLEASE.
