Comments: I have skied at Copper since 1978, brought my girlfriend who became my wife to Copper, had my 3 year old daughter start ski lesson at Copper, and finally bought a condo at Copper, I can state for certain that an upgrade to the Lumberjack, additional snowmaking around the pod, as well as better utilization of the terrain is horribly needed and will benefit the entire resort. With this improvement and a couple others, Copper will provide some of the best beginner experiences available anywhere. These improvements will also spread the people out more during busy times and will enable Copper to open this terrain earlier which will be meaningful to families who want to ride the mountain before Christmas. I am hopeful that this will be approved and carried out sooner than later. Thank you.
