Comments: I attended the field trip 5-27-2021 at Cripple Creek Rd and found it very educational and enlightening. I believe the Forest Service personnel explained their position very well and assured those attending that supervision and safety are a priority as well as maintaining a clean environment. Disruption of user activities will be kept to a minimum.
It was asked about estimated net revenues for the project and of the proceeds would be disbursed in percentage. Will all proceeds be invested locally? If not where and why not?
