Comments: I do not want trails extended to vehicles wider than 50 in especially in the Ironton district. Trail maintenance in the Ironton district is already abysmal. There are years long trail closures in the Ironton district extremely dangerous conditions on trails and there is no enforcement to keep people off the trails during the close seasons or to enforce the existing width restrictions. All money and effort in this district should be put toward maintenance and extending existing trails like connecting Superior to hanging Rock. If in the future if the trail systems are connected and well maintained then maybe widening the trails would be a good idea but at this point in time basic maintenance should be the main goal for the Ironton district.
