Comments: We must start putting more restrictions on all of our natural resources. People need to respect our forests and waterways. As climate change increasingly puts stress on our forests, streams and rivers, we need to limit the amount of abuse that people cause. I believe stricter rules on access and higher visibility of rangers is necessary. Too many people these days cannot be trusted. It only took one person with fireworks to destroy a huge area in the Gorge. As silly as it may sound, I watch shows from many other states that have far more rangers that Oregon does. Why is that?
