Title:

Comments: While I appreciate the consideration being given to expand use of the forest, I believe that very careful consideration needs to be given to increasing the width restrictions that are currently in place. Wider machines typically mean significantly more horsepower and therefore speed on the trails as well as damage done to the trails. One of the things that my family and I appreciate about riding in Wayne national forest is the fact that we do not have to deal with incredibly fast machines coming head on at us, and at the deep ruts that these machines can create. Thank you, Ron Monroe
