Comments: I would be in favor of allowing wider vehicles on certain trails and dirt bikes on their own as well. I would prefer them to be separated far enough that people are not inadvertently accessing trails not designated for their use. Dirt bikes travel too fast, so it would be nice to get some off the main trails, and side by sides have a low viewpoint while traveling and usually do not see oncoming traffic until well after the oncoming traffic has spotted them. So, separate trails would allow us to lessen the conflicts both present. I would also love to see some flexibility in the riding season. Especially when the ground is frozen solid. Thank you for all you do. Keep our trails enjoyable.
