Comments: Please consider single track trails.

There is currently no single track for motorcycles anywhere in Ohio. The closest and best single track trails are in Michigan state forest areas. These trails have co-existed with SXS trails for many years and seem easier to maintain and create. It's a shame every trail in Ohio has to start with a bulldozer instead of a deer trail. The only way to enjoy good single track in Ohio is to ride dual sport events and enduro races on private land created by local clubs. Two wheels are much more fun and challenging than riding around in \$20,000 machines making mud holes and creating more trail maintenance. Dirt biking is an actual workout and good for health.

The Wayne areas have great potential of attracting more bikers with easy to challenging single track for both younger and experienced riders. Please consider making Ohio a dirt bike destination like Michigan. If it is here, people will use it and probably help create it, given the opportunity!

Thank you,
Jeff Roberts
