Comments: Hello,
I am surprised that you are considering raising the allowable noise level. I encourage you to ban all motorized vehicles that harm the aural environment. I have tried several times to recreate, that is, re-create a sense of connection with nature, only to be almost run over by reckless drivers.

I suggest that folks who want to have a thrill get a fat tired bicycle.

Hope you listen to those who are worried about our ongoing climate change catastrophe.

Thank you,
Mark Bello
