Comments: i do not support this change in the forest handbook at all and believe this agency is death to forest and nature. the usda is about farms not at all about nature and it shows in the way our forests have been abused by usda mgt in the past 70 years. this agency should not be selling any property at all from our national lands. we need every bit of nature we can save. no way should 40 acres ever be sold. the money from these sales will never see the light of day at this corrupt agency.

this sales effort is no help to the american people. we need to save every bit of land we communally own. this plan is harmful to america and needs to be shut down. congress is corrupt in passing any bill like this. usda probably lied to them about the real meaning of this bill. get usda out of nature. it is not a division that cares one bit about nature. all its various divisions are about killing nature for money. the usfws, blm, fw. etc. all are about killing nature. that seems to be its focus. take these nature programs out of the usda.
