Comments: I would like to suggest a purpose built ascending trail beginning at the winter trailhead parking on the Geyser Pass road, and or from the loop road paralleling the warner lake road. I believe that a well built climbing trail is compatible to both bikes and hikers. This will eliminate many instances of conflict between downhill riders and uphill traffic. This will also provide a safe alternative to riding or hiking on the roads to gain access to higher trails, also cutting down on vehicle traffic .
