Comments:
I live directly across the river from the dunes where much of the OHVs ride. It can ruin sitting out on my deck, when gardening or hiking local trails. There are times when I can hear the noise from their engines inside my house with all the doors and windows closed.
Why in the world would you think it is a good idea to raise the decibel level when you should be lowering it? The current allowable decibel levels are already too high and apparently are not enforced.
