Comments: I am against any increased drilling in the Sespe Oilfield, and especially so if it involves hydraulic fracturing. I am against the "Applications for Permit to Drill (APD's) in the Sespe Oil Field #43309". My opinion is that there are too many unknown effects of hydraulic fracturing, and, given the ongoing drought, I am concerned that hydraulic could disrupt the integrity of our local aquifers. I urge that the Applications be denied.

Thank you.
