Comments: After review of the proposed action relative to the Meadow Valley Public Access plan, I am in full support. As a retired Wildlife Manager with the AZ Game and Fish Dept, with 21 years managing Game Management units 35A and B, which encompass the Meadow Valley area, I am well aware of the significance of public access into this area. Along with sportsmen, the area is a popular area for birders, hikers and bicyclists gaining access to the AZ Trail, horseback users, atv riders, along with a variety of other users. With Bog Hole and Red Rock Canyon, there are a large variety of bird species, T&E and candidate species that reside in the area. Continued access into this ecologically rich area is critically important to public access users and researchers.
Thanks for the opportunity to comment.
