Comments: This replacement will use existing technology that will be well utilized to maintain more efficient use of the Meadows permit area. I would love to see it be more accessible to more users and a 6 person chairlift would help spread users across the mountain faster. This is one of the main chairlifts and having a larger loading capacity would shorten the already long lines at Meadows. I do not see ridership going down, and allowing for more users increases the users that are turned away due to crowded resort/expensive attributes of winter skiing.
