Comments: During the Winters of most of 2019- 2020 and all of 2020-2021, people were cautious about riding the lift with strangers due to Covid-19 risk. Now that we are midway through 2021, the new variant is creating a real surge especially among the unvaccinated. So filling the chairs may not be an option, and the lift lines will continue to be outrageous. So anything we can do now, to minimize the time to get people up out of the base area will be helpful. And if we should be so lucky to get the pandemic under control, that will be so much the better, since all 6 of those seats will be filled, without risk.

Can I also put in a plug for a mid-mountain restroom? Probably somewhere near Mazot. Even little Skibowl has a mid-mountain privy, and Meadows still forces people to use the trees up there! Most inconvenient for us girls, and anyone who needs #2.
