Title:

Comments: The camping closure area should be extended beyond 1/2 mile from the trailheads listed and include larger areas of popular recreation sites in the Reno area. All of the peavine area east of peavine peak should be closed to camping both to encourage the day use recreation the area is managed for and to limit the fire danger associated with camping. Please consider a larger area closed to camping. The proposed small areas will not solve the large resource and visitor use impacts that are currently resulting from camping in the area.
