First name: Gwen

Last name: Marshall

Organization: Protect Biodiversity In Public Forests

Title: network coordinator

Comments: I am writing in support of the future of Red River Gorge. I live in Cincinnati, Ohio so this is the nicest, best and wildest area somewhat near where I live. It is very important that we maintain areas like Red River Gorge so that future generations have wild and natural areas. I think it is important that people be able to visit these areas, but I don't like seeing them used as areas where young people (and others) can go to drink and party since that seems like an inappropriate use of wild areas. I don't think that Red River Gorge should be expected to produce commercial, economic value because I think the natural products (clean air & water as well as wildlife habitat) of natural areas are more important. The Red River Gorge needs to be managed in a future focused manner, not in an immediate gratification manner.
