Comments: I am pleased you are presenting a 10-year plan for the Upper Portion of the Mon Forest but appeal you to not only increase significantly increase the amount of harvest but allow the successful bidder to choose the method of harvest. Our National Forest has been neglected for years and now we are even losing carbon due to dying trees and the inability of natural growth to take root. As managers of our National Forests you have been charged with protecting our land which should include best management practices. Thank you for your consideration.
