First name: Monte
Last name: Seehorn
Organization:
Title:
Comments: The foothills area of the Chattahoochee NF is where the vast majority of management action has taken place in recent years. Very little management activity has taken place in the larger more mountainous regions of the Forest. Implementation of the Foothills Plan will simply push any attempt to manage the larger more mountainous portion of the Forest no telling how far into the future. The Foothills Plan should be dropped, and a Plan incorporating the entire Forest initiated!
