Comments: I am very happy to hear of an increase in harvesting timber in the Upper Cheat River. However I am also very disappointed that its more of the same. Helicopter logging and cable yarding are very expensive and completely unnecessary. WV loggers have been held to a high standard with the best management practices in place and have proven that environmental quality is sustained. The amount of money wasted to helicopter and cable log is huge. Please consider conventional logging in the Upper Cheat. WV loggers will not disappoint.
