Title:

Comments: I am opposed to allowing heli-ski operations in the Queen's Chair area at the east end of Eyak Lake (in Area 12). This area is used by me and other Cordova-based, human-powered backcountry skiers, as it has relatively easy access from Cordova. Deleting this area from the proposed operating areas would still leave the heli-ski permittees with a huge area to conduct their business operations. I think it is important to provide areas near Cordova for human-powered backcountry skiing and snowshoeing that are not shared with the commercial heli-ski operators, so that the tranquility and virgin snow characteristics of a human-powered backcountry ski experience are maintained.
