Comments: Dear Forest Service Staff,

Thank you for using a programmatic EA to keep the public involved and also for managing for old growth- 2 things I have been informed about by Georgia Forest Watch. In your Foothills Landscape Project, I understand the need to manage forests since my husband is a forester. I hope you will minimize building new roads and choose to utilize the ones you already have by cutting close to existing roads. Please strive to protect our mountain treasures- this means for the people to have access to undeveloped/undisturbed areas as well as provided much needed old growth forest habitats for wildlife. Please leave generous buffers near streams to keep our waters clear of sediments. Thank you so much!
