Title:

Comments: Concerning the Foothills Landscape Project # 52509, although the EA lacked specific details, I would like to see the following: 1) Select tree harvesting to insure a the restoration of a native forest. 2) No repeated herbicide or burning treatments. 3) Preservations of all old growth stands like the 600 acres in the Chattooga watershed. 4) No logging, burning or road construction in Wilderness or Roadless areas.
