Title:

Comments: Our Georgia FORESTS, especially the Chattahoochee, are glorious and full of old -growth trees. Please continue to manage them w/ respect and do not use Fire to clean-up undergrowth. Our woods are like tinderboxes, despite the rains, and we must keep our old & virgin-istic woods free from Extra roads & fire damage.

The US Forest Service, ya'll are doing a great job but Please, please do not let Private Industry pressure you into opening our woods & forest up to (unnecessary) Logging and building. Thank you.

PS. We just returned from Rabun Co~~~just delightful campgrounds, trails & waterfalls. Please continue to protect them, as well as the wildness around Helen, Ga.
