Title:
Comments: Forest Service should limit the scope of the project to:

Exclude areas more than half a mile from a road. "Temporary roads" actually last decades to centuries, and regardless of any good that logging accomplishes, access roads disrupt ground water, fragment habitat, and destroy soilStop plans to log in mesic (moist forests)

Exclude Georgia's Mountain Treasures from commercial timber harvests

Restrict commercial timber harvests to "fire adapted" forest types. Those forest types cover 77% of the Foothills Landscape and include the areas where most people agree active management is most needed.
