Comments: I'm glad some changes were made to improve the EA, specifically to protect old growth per watershed, and to do site specific planning and public involvement. However, there's still way too much logging and management proposed. Please exclude Georgia's Mountain Treasures from commercial timber harvests, restrict commercial timber harvests to fire adapted forest types, exclude areas more than half a mile from a road, and don't cut all trees in attempts to regenerate southern yellow pine. We need to recognize the huge economic benefit that the CNF provide, and not just look at the income from logging.
