Title:

Comments: I would like to ask that you : 1. Exclude Georgia's Mountain Treasures for timber harvest. 2. Restrict commercial timber harvest to fire adapted forest types. 3. Exclude area which are more than half a mile from an existing road. 4. Avoid creating temporary roads that disrupt ground water, fragment habitat and destroy soil. 5. Not cut all trees in an attempt to regenerate Southern Yellow Pine. 6. Not thin forest on moist soils. 6. Not cut old growth trees. Choose alternative 3. I would also like to add that due to the increase of building and tourist activity many of the large tracts of privately owned lands are being developed. This action is resulting in a great deal of environmental pollution.
