Comments: multiple uses which are extractive seem to get the most play at this corrupt agency that loves profiteers. yuou are failing to save nature with this corrution. we want (l) no hunting (2) no grazing on forest lands (3) no logging
4. no chemical application 5. no prescrbied burning which is fake since they go out of control so very very often. 6. no new roads, we need to have protection of the general american public to have the highest priority not to cater to hunters and their fetish for killing anmials that hurt all of us in the usa who want to protect nature and the fetish of this agency to let robbeer baron cattle ranchers run wild so that no land is left for wildlife and animals are slaugthered left and right. we cannot continue to countenance this snuffing out of all life on earth that is not human. and the continual changing of trees and nature into concrete and human develoopment. your agency has no respect for nature at all. none.
