Title:

Comments: I live in Patagonia. Before the current mining activity closed Flux Canyon Road, I used flux canyon road for riding my mountain bike. That is now impossible so I am denied use of a lot of the national forest. I used to bike up Harshaw Road, now, too heavily trafficked for cycling. The wildlife I used to observe in the national forest off flux canyon has largely disappeared. Do not allow the Australian company South 32 to further expand. Deny the purchase of national forest land.
