Comments: I support going with option "D". I would like to see less green cut logging which currently is destroying too much of the forest on the Grand Mesa. I want more wilderness designation, since our increasing population needs more of such lands protected. Also, I would like less motorized vehicles. Currently, ATV's run all over the Grand Mesa in the summer and snowmobiles through the winter. The fishing pressure has destroyed many lakes on the Grand Mesa while CPW does little to mitigate the situation.
