First name: Butch

Last name: Young

Organization:

Title:

Comments: I support the proposed action. It will help sustain the moose population in the Thomas Bay Area and will not adversely affect deer populations. I have seen moose habitat decline drastically since I began visiting the area in 1976. Because of the regrowth of clear cuts, successional vegetation which forms much of the moose diet is lacking. Continuous harvest of young timber will be of great value to moose habitat. I am a landowner in the Point Agassiz area.
