Comments: The final plan must include significantly more wilderness recommendations. We must protect our wild places. Once they are gone, we can't get them back!

The Community Conservation Proposal must be better reflected, and incorporated in the final plan. You need to consider the wishes of the people living in this area!

The draft plan prioritizes logging over conservation. Why? Whose desires does that reflect? Again, not the majority of the people actually living in this area.

The draft plan does not adequately protect the diversity of imperiled species that occupy the GMUG.
