Comments: As someone with land located near Harshaw Road, I am extremely concerned by the potential impact of proposed mining operations on groundwater in our immediate area. Mining companies have no prior history showing any ability to preserve this resource which is so sparse in our area. I also share many of the concerns voiced by the Patagonia Area Resource Alliance, particularly with regard to continuing access to recreational resources and culturally significant sites. I would urge you not to sell them the acreage they requested in our area.

Thank you!
