Comments: My comments regarding Small Tracts Act Sale to Arizona Minerals:

I respectfully request recording my complete total agreement with the letter submitted by Patagonia Area Resources Alliance and would add my personal comments as follows: Arizona is in "Exceptional Drought" conditions and we cannot continue to approve and move forward with projects that continue to deplete and/or contaminate our finite fresh water supply - whether it be groundwater, springs, creeks, rivers, or lakes. Mining in the Patagonia Mountains risks people's very existence in continuing to live in Patagonia period. No Water No Life.
