Comments: Dear Forest Service People,

As a Patagonia property owner, I am truly dismayed at the prospect of an Australian mining company being not just allowed but being invited to ravage such beautiful, pristine land. How can you possibly live with yourselves knowing you could be responsible for that?

It is no surprise that the mining company has shown little respect for the land itself or the damage to the watershed. As a member of The Patagonia Resource Alliance, I believe I believe and agree with their position. There is strength and logic in this message ...it is the strength and wisdom of the community, please hear this important argument.

I am asking you to use common sense, do not sell our precious land to a foreign company! Enough is enough! Look at their record!

You can do the right thing, you are not obligated to act like people who do not care about our land and our values!

Thank each of you for thinking and acting carefully, bravely and respectfully.

Katya Peterson
