Comments: From the draft " Recreation management was one of the primary drivers of the plan development and mapping of alternatives, and more plan direction is devoted to this than any other resource."

But this statement does say what recreation was considered. From the poor decision for extending the harvest area and length of time to harvest near the Grand Skyway Nordic Trail System, cross country skiing was deemed insignificant.

I hope the overwhelming response from the ski community convinces you that breaking old agreements to benefit logging buddies is not a good decision and you rescind that particular timber sale, and reduce the timber extraction in this draft. I've seen the extraction in San Juan mountains near Wheeler Geologic Area. The design maximizes timber revenue and minimizes preservation of quiet recreation needs.
