Comments: Thank you for the opportunity to comment on this item..

First, let me say that I did contact Christopher Jones & Stephanie Medlin with a couple of concerns and they were BOTH very Professional KNOWLEDGABLE, and Friendly so you have a couple of Fine folks there .. My concern was the effects on HUMANS when this is dispersed and was assured that there should not be any adverse reaction for humans or fish so I think this is a good idea to STAY AHEAD OF THIS problem ..

Second, The dispersal should not be done DURING any HUNTING season to prevent any contact with humans during the dispersal .. I was also assured that the fish should not be affected either since the agent is dispersed into the canopy rather than at ground level ..

So to Sum up. Christopher was GREAT and I think this is a GOOD idea to try and stay ahead of any future problems

THANK YOU .
