Comments: I request the Forest Supervisor to change the management area designation of the Snodgrass Mountain area from its current downhill ski area designation to some designation akin to backcountry recreation, with the focus being removal of the allocation as a downhill ski area (and to follow that with the removal of the area from CBMR's special use permit).

This reallocation is consistent with then Forest Supervisor Charles Richmond's decision to not consider expansion of the ski area onto Snodgrass Mountain and then Associate Deputy Chief Gloria Manning's second level appeal decision directing the Forest Supervisor to either provide direction to the ski area on how it could develop a proposal he would accept or change the Forest Plan management area allocation to reflect his decision.

It is important for the Forest Supervisor to finally remove the expansion option on Snodgrass Mountain so the public and agency both will not have to go through such divisive experiences as it did in the 1990s and again in the 2000s.
