Comments: Climate change. Climate change. Climate change. Do you really need another reason to not double the size of Lutsen ski resort?! The environment is being destroyed. How can you possibly even consider expanding into the Superior National Forest at a time like this? Destroying the trees we need to help combat climate change...ruining plant and animal habitats...where is your common sense?! We should be doing everything in our power to protect this planet right now. We need more green space not less. It saddens me to see the selfishness and greed of Lutsen Mountains Ski Resort in attempting this devastating project- they will lose my family as customers if this passes. I believe this expansion project will have a detrimental effect on the forest and the surrounding region and therefore must NOT be approved.
