Title:

Comments: I am 100% in favor of this plan. If use of forest resources in this manner works out west, it certainly can work in Minnesota. This is the right thing for the region and the state creating additional skiing opportunities and jobs simultaneously.

The effected area is nominal (and certainly nominal compared to any recent forest fire. This use is in alignment with precedent and one that makes our up north skiing gem all the better.

Let's make this project happen!

Thank you

Brett Budzius
