Title:

Comments: Hello I support alternate #2. This expansion will serve the people in the area with skiing, work, hiking and so much more. New trail cut, for the new ski runs, from forest will provide a diverse environment for the wild life in the area. Deer and grouse and others will use these areas Ski runs during the spring, summer and fall ( 9 month out of the year,) most the the year. Open field vegetation will grow and provide new habitat and provide a diverse ecogoloy. Opposed to just forest area which there are thousands of acres in the surrounding existing areas.

Thank you

Bill Westrick Owner of 117A Caribou Highlands
