Title:

Comments: Hello I support alternate #2. This expansion will serve the people in the area with skiing, work, hiking and so much more. New trail cut, for the new ski runs, from forest will provide a diverse environment for the wild life in the area. Deer and grouse and others will use these areas Ski runs during the spring, summer and fall (9 month out of the year,) most the the year. Open field vegetation will grow and provide new habitat and provide a diverse ecogoloy. Opposed to just forest area which there are thousands of acres in the surrounding existing areas.

Thank you

Bill Westrick Owner of 117A Caribou Highlands
