Comments: US Forestry Service

In the broader context of the United States, the North Short of Minnesota is a hidden gem, and for me has personally become a place of relaxation. The cornerstone of this area is Lutsen Mountain as it provides me and my family the ability to be active in the winter enjoying the beauty of the north shore.

As a result of this, I purchased land just off Ski Hill Road and intend to build a cabin to we can spend more time up North. As a result of this, I am in full support of the Lutsen expansion plans, as it will only enhance my ability to enjoy the outdoors.
