Comments: I'm glad to hear of a new forest plan in process for the Manti-La Sal!

In light of increasing pressures the forest faces from a hotter, drier Colorado Plateau, the revised Forest Plan must consider climate change; conservation of wildlands, water, native plants, and wildlife; increased Indigenous influence, and better responsiveness to the public.

All of these needs can be met by the Conservation Alternative, and it must be analyzed in its full and complete form in the upcoming Draft Environmental Impact Statement.

I travel through the La Sals frequently and have since I was a teenager. That land is dear to my heart and the land and all on it deserve preservation.
