Comments: Thank you for the opportunity to comment on your Draft Revised Forest Plan.

The Manti-La Sal is important to me, and I'd like the forest to analyze the Conservation Alternative, in full, in the upcoming Draft Environmental Impact Statement. This area is important to me because I know this area will be affected by climate change and so should preserve and protect all old-growth trees and the species who depend upon them (i.e. pinyon jays). Areas such as Left Fork Huntington Creek Research Natural Area (RNA), Sinbad Ridge RNA, Red Towers Botanical Area, and Heliotrope Botanical Area should be protected. In addition, tribal interests should be prioritized with regards to cultural sites and involved with all planning. Finally, grazing management in this area is woefully out of date and should be modernized to benefit the native plants, wildlife and limited water resources.

Thank you for your time and consideration.
