Comments: Thank you for the opportunity to comment on your Draft Revised Forest Plan.

The Manti-La Sal is important to me, and Id like the forest to analyze the Conservation Alternative, in full, in the upcoming Draft Environmental Impact Statement. In addition, Id also like the forest to respect indigenous ruins and sacred areas. Also we protect old growth trees and younger trees to be able to grow to become old growth. Grazing needs to be at a minimum of 30% per scientific research.
Bears Ears must be returned to the pre-Trump era. Lastly absolutely no special designations for machines in any form ATVs etc.
This land must remain free and unimpaired to let nature take its course.
