Comments: Thank you for the opportunity to comment.

The Manti-La Sal should preserve and protect old-growth trees, particularly in the pinyon and juniper and ponderosa pine forest types. In addition, the forest should designate the pinyon jay as a species of conservation concern.

The Manti-La Sal should adopt the Conservation Alternatives wilderness proposal and establish the following protected areas: Left Fork Huntington Creek Research Natural Area (RNA), Sinbad Ridge RNA, Red Towers Botanical Area, and Heliotrope Botanical Area.

The Manti-La Sal's forest plan must prioritize the protection of cultural sites and areas of tribal interest over other uses of the forest, and the forest must encourage partnerships with Native nations to incorporate Indigenous traditional knowledge in planning.

Some considerations that are important to me as the Draft Environmental Impact Statement is developed are modernizing grazing management (by allowing no more than 30% utilization of native species), preservation of old-growth forests and intact roadless areas and wilderness, and protection of pinyon jays as species of conservation concern.

The plan should adopt the Conservation Alternatives wilderness proposal and establish the following protected areas: Left Fork Huntington Creek Research Natural Area (RNA), Sinbad Ridge RNA, Red Towers Botanical Area, and Heliotrope Botanical Area.

When it comes to cultural sites, the forest should adopt protections in the plan that place a priority on their preservation. Tribes have thousands of years of locally relevant experience managing natural resources, and the Manti-La Sal must do better to encourage partnerships with Native nations to incorporate Indigenous Traditional Knowledge in the upcoming plan.

Finally, Interior Secretary Deb Haaland has recommended that full protection be returned to Bears Ears National Monument, and President Biden is widely expected to take action soon. Bears Ears planning belongs in a revised Monument Management Plan, not this Forest Plan, and that plan should be written in cooperation with the BLM and with shared governance from Native nations.

Thanks for your consideration of these comments,
