Comments: With such short time to respond to the Sheep creek vegetation management. We recreate in this area alot, I am concerned about existing user trails in the area that might be impacted. There are numerous routes along with the A & B trail system in this area. All user routes are old roads that have been in use for several years. The motorized routes are accessible by existing low maintenance roads that serve the area well. I don't think that any closures are appropriate!

this area has minimal usage at best, except during the hunting seasons. We have tried to get a loop trail from chicken hill trail back using existing roads in the area, no luck. The scope of this project is just to large to review, let alone to make comments on. I have commented on many actions made by the FS during your motorized comments, and know that any info we submit is usually used to close more of our recreation areas. With all the money that the FS has spent in the Sheep creek area and now as usual trying to shut down more of our public forest access! It would be nice if the FS would use funds that they always have available to close roads, use it to improve existing roads!
