Title:

Comments: Hi Stefanie, I talked with you in regards to input for the campsites at Yukwah on the 600 line. I live on that road and have seen a lot in the last 18 years. The biggest problem being the homeless using it to live not camp for recreation. They have left their garbage, needles, human waste, with no regards to the land and the river less than 50 ft away.

The locals know this area and use it to congregate to party, and target shoot at the trees. The trees have taken a beating in that area, It saddens me to see the National Forest left like this.

There is a regulated managed campground less than a $\frac{1}{2}$ mile from this site, so your not out in the middle of nowhere with no place to camp. Across the road from this site they have been camping behind the Forest Service gate, building fires in an area that is not cleared for wild fire danger. It would be great to see a sign posting no camping.

This being said this is my input:

I wish the area was closed for day use only.

Designated trails to river.

Signs regarding disposing of human waste. (they has posted signs before and they tear them down)

If camping is allowed:

The road rocked off to vehicles, tent only.

A check in system with names and license number posted on a board at the front of the camp. (there has been fights over who had the spot first) This would promote accountability and help the officers that patrol the area.

Designated fire rings.

If fire danger is high, area completely closed.

I appreciate the opportunity to give input on this project.

Thank you,

Lori Barnes
